## Thermok SOLAR

from  
**\$265**

Solar hot water and solar hot air differential temperature controller for PV and DC powered applications. Four temperature sensor channels, LCD display for real-time view and easy programming, two solid state DC relay outputs. Can run directly from PV panel. Other models available that include data logging and live Internet data capabilities!

## Solar Powered Outdoor Wind Data Logger Package

APRS World's most popular Wind Data Logger package. Perfect for remote wind data collection under the harshest of conditions, this package features the #40R reed switch anemometer for accuracy and durability.
